SUMMARY

Performance-driven Frontend Developer with 2+ years of experience specializing in React.js. Proven track record in building scalable web and mobile applications, integrating real-time WebSocket communication, and deploying production-ready apps to the Google Play Store and Apple App Store. Expert in modern JavaScript (ES6+), TypeScript, and state management via Redux and TanStack Query.

SKILLS

- **Frontend:** React.js, Component Architecture, Responsive Design.
 - **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript.
 - **UI & Styling:** Tailwind CSS, Shadcn UI, Material UI.
 - **State & API:** Redux, Zustand, TanStack Query, Axios, REST APIs.
 - **Tools:** Git, GitHub, VS Code, Android Studio, Postman, Firebase.
-

WORK EXPERIENCE

Triton Tech Labs | **Software Developer** Feb 2024 – Present

- **Optimized UI Performance:** Improved React.js application speed by 30% through strategic component optimization and implementation of lazy loading.
 - **Real-time Integration:** Developed low-latency communication between applications and hardware devices using Socket.IO.
 - **Clean Architecture:** Collaborated on full-cycle development focusing on reliability, efficiency, and reusable component design.
-

KEY PROJECTS

MandlacX

- Enhanced responsive web and mobile features utilizing React.js.
- Integrated REST APIs for dynamic data rendering and implemented Firebase Cloud Messaging (FCM) for push notifications.
- Executed WebSocket communication to enable real-time device interaction.

Hawkeye

- Built a real-time monitoring web app for capturing vehicle weight and live images.
 - Deployed WebSocket protocols to ensure seamless hardware-to-software communication.
 - Designed a responsive UI and optimized frontend performance for high-traffic monitoring.
-

EDUCATION

Bachelor of Science in Computer Science (Distance Education)
Alagappa University | July 2025 – April 2028 (Expected)

Diploma In Mechanical Engineering

Arulmigu Senthilandavar polytechnic collage | Aug 2017 – April 2019
